## HOW TO CREATE YOUR NAME LIST FILE

When compiling your name list, keep in mind that first name of recipient is your most personal approach. However, first & last names, last name only, or '(last name) Family' are acceptable as well. Whatever you put in the cells of your recipient name list will be exactly what we merge into the images. Orders will be packaged per agent and calendars will be boxed in exact order as they appear in agent's name list.

The required format is as follows:
- Excel spreadsheet file type required.
- In columnar format, simply list the first or first & last names that are to appear in each calendar.
  (First recipient name in cell A1, second recipient name in cell A2, etc.)
